FLUXX
Broiler Feeding System

Are you ready for The Flood?

- "Snap-on-Drop" facilitates installation
- Hinged pan assembly makes cleaning effortless

FLUXX's innovative **360° flooding feature** is just one of the many technologies that make this all-new broiler feeding system one of the most advanced and affordable around. With its unique flooding technology, the FLUXX floods an **even supply of feed**, all the way around the pan. This means the best start for your day-old chicks. Plus, with its **Snap-on-Drop** installation, leave the tools behind and simply snap on each pan. As your birds grow, feed volume can be adjusted by simply raising or lowering the feed line. No more time-consuming, pan-to-pan adjustments. And, after you've grown another successful flock, you'll find that FLUXX's pan is **quick and easy to clean**. Best of all, this technologically advanced broiler feeding system is available at a surprisingly affordable price. **Call Big Dutchman, today**, and let one of our system consultants configure a FLUXX system to meet your operation's unique needs.

- Just raise or lower the feed line to adjust feed volume in every feeder
- "Spin-n-Lock" adjustment (patent pending)
- Pan lip design, baffles, and peck guard maintain even feed level for easy access of day-old chicks and minimize feed waste
- Technologically advanced—surprisingly affordable
