A BEATING.

GLADIATOR

TURKEY FEEDING PAN

GLADIATOR

TURKEY FEEDING PAN

The **GLADIATOR** Turkey feeding pan is engineered to stand up against the daily rigors of feeding the most aggressive and heavy turkeys. From flock-to-flock, the **GLADIATOR** pan is made to take a beating, and designed for ease of maintenance and adjustability.

- Snap on cap provides easy assembly, and maintenance. Pans can be quickly removed individually for maintenance.
- Swinging pan design minimizes bruising while maximizing meat quality
- Snap'n Lock mechanism locks the dish securely to the grille to eliminate dish drop. Dish unlocks and is removed for easy and thorough cleaning between flocks.
- Feed savings lip design reduces feed waste, resulting in better feed conversions
- Feed levels can easily be adjusted by using a simple, yet effective design. Our twist and lock adjustment on each pan allows for easy and precise feed level adjustments.
- Large windows allow for easy access to feed

Snap'n Lock dish stays secured to the grille to eliminate dish drop

Feed savings lip catches feed and funnels it back into the dish

Swinging / rotating pan maximizes meat quality

Fill and auger system delivers an accurate and uniform feed level to the entire flock

Our patented use of the shocker wire in flooring keeps birds from perching on the feed tube, and because of the simple design, adjusting the feed level is as easy as a turn of a crank.
