

Big Dutchman®

BD FLEX - Quarter Stalls

For Group Housed Sows

By supplying the right housing and feeding systems, Big Dutchman can provide you with the technical conditions needed. In modern sow management, the correct housing and equipment plays an important role for economic success. Whether it is a new house or refurbishment of existing houses, our specialists will work with you to develop the ideal concept for successful and animal-friendly piglet production.

Group housing of sows improves their well-being as well as their constitution. There are several housing and feeding systems available from Big Dutchman. The most important factor is that the selected system fits your farm's individual requirements.

Features and Advantages:

- All sows eat at the same time
- The farm manager can easily manage his stock while the sows are feeding
- Sows do not need a training phase
- Forming sow groups with identical constitution is very simple
- Simple pen arrangement
- Cost-effective solution
- The stanchions protect sow's head and shoulders from aggressive animals while eating
- Solid rod design does not inhibit airflow
- Various dimensions available
- Bolt in place design with top straps simplifies accurate installation

Smart solutions for better sow management
