

Big Dutchman®

BD-Freedom Pen

Flexible farrowing pen with turn-around crate

BD-Freedom Farrowing Pen

More freedom for sows and safe zones for piglets

Since loose sow housing has proven beneficial during gestation, there is a growing demand to increase space and freedom of movement for lactating sows as well. Big Dutchman's newly developed BD-Freedom farrowing pen combines flexible space for the sow and the best possible protection for piglets.

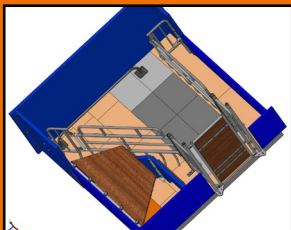

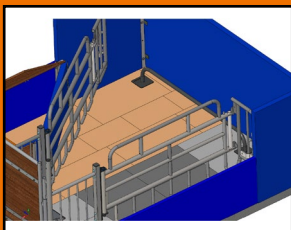

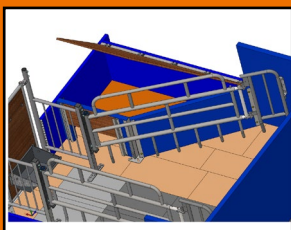

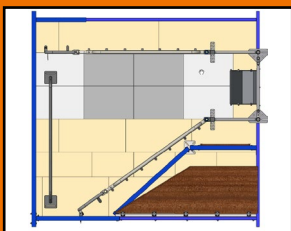

The crate design is based on the popular BD-SWING system, with movable side panels and piglet protection bars. The crate can be closed to secure the sow for birthing and treatment, then opened when the sow and piglets have become accustomed to their environment.

The pen layout and design of the crate/feeding area can be customized to fit your personal preferences.

Let our experts help you find the best solutions to satisfy your needs and goals.

Customize your BD-Freedom Pen!

We have multiple options available to help make the BD-Freedom Pen the perfect fit for you and your sows.

Features:

- The flexible crate can be arranged in a straight or diagonal position
- With or without front exit (trough door)
- The side panels can be opened in the front and/or back for maximum space conversion
- Special back door allows for flexible crate transition and easy access
- The piglet protection bars maximize piglet livability by ensuring safe movement of the sow
- Protected creep area and piglet nest
- Low pen partitions for easy monitoring and access
- Different floor variations and creep heating possible
- Suggested (variable) pen dimensions: 2.00 x 2.60m (6.5 x 8.5'). Space for sow: 2.5m² (26.9 sqft)
