Relax

Community style nest with more laying space for your hens

Relax

The perfect solution for broiler breeders

Relax is a community style nest designed especially for broiler breeders. It has proven to provide birds with a better laying environment around the world.

The **Relax** nest achieves high quality hatching eggs by offering high nest acceptance, a high hygienic standard, short rolling-off distance, gentle transport of eggs, and easy nest and egg belt control.

IMPORTANT FEATURES

- High nest acceptance
- Room for 220-240 birds per nest section, so birds won't fight for nest space
- Short rolling-off distance and gentle transport of the eggs
- Easy nest and egg belt control
- Egg channel is available in two widths: 15.7 or 19.7 inch
- Nest can be closed to prevent hens from sleeping or brooding inside the nest
- Simple plug-in design, almost screwless for quick and easy assembly
- Can be combined with our integrated nest scale, **NESCA**, to weigh birds accurately as they enter the nest to lay

INTEGRATED NEST SCALE

The optional **NESCA** nest scale can be integrated into the **Relax** nest and automatically determines the weight of hens visiting the nest to lay their eggs. **NESCA** records a large range of weights of a flock of hens without requiring any additional work by the staff.

NESCA consists of a bottom wire mesh which rests on four load cells, which transmit their results to the production computer via a weighing module

TECHNICAL SPECIFICATIONS

Relax	Type 400	Type 500
Length	94.9 in	94.9 in
Width	57.1 in	61.0 in
Height	69.3 in	70.5 in
