**FLUXX™ FX2GLO**

Broiler feeding pan that brings light where it matters most

The next bright idea is here. As farm managers look for better ways to add light to their barns, Big Dutchman's **FLUXX™ FX2GLO** broiler feed pan offers a good solution for dimmable house lighting.

The **FX2GLO** follows the performance proven design of the **FLUXX™ FX2** feed pan. It has an integrated LED light inside of the inner cylinder. Light placement inside the center column of the pan attracts the birds quickly to the feed so young birds have the best potential for a good and healthy start.

## PROVEN PAN DESIGN

The **FLUXX™ FX2** 14" feed pan allows for more feeding space and up to 16 feed stations, encouraging the birds to eat straight into the pan. In addition, the 360° flood provides a large amount of feed at the edge of the pan, making it easily accessible.

Its advantages include:

- Internal lip is designed for easy feed access, less waste and injury
- Feed levels are easily set with 'Spin n' Lock' adjustment
- Pan spins 360 degrees providing even feed distribution
- Swinging pan design for easy cleaning and less injury
- Snap on top cap for easy installation and service
- Additional dish latch to ensure dish stays secured
- Will last for years with heavy duty plastic construction

## TRANSPARENT CYLINDER

- Places light on feed, helping chicks find feed quickly
- Design allows light to be visible without being directly in contact with feed

## LED LIGHTS

- 48VDC protective low voltage for highest safety
- Resistant to high-pressure cleaning (IP69K)
- Flicker-free, dimmable LED
- Long lasting bulbs
- Easy to replace

## EASY INSTALLATION

- Components snap together for simple, quick and flexible install
- In addition to standard FLUXX 360 pan assembly, parts include clamp, LED light and ribbon cable
