

Big Dutchman®

NEW!

NXB ReMix

The next generation of nesting for broiler breeders

Introducing the **NXB ReMix** – a reimagined version of Big Dutchman's trusted **NXB** nest. Built for today's high-performing broiler breeders, this hybrid-style **small group nest** blends the best of both community and single-hole designs to deliver a cleaner, more comfortable laying environment.

With a compact footprint tailored to current house dimensions and smart upgrades like a new nest closure system, the **NXB ReMix** is made to help you reduce floor eggs, improve egg quality, and support the welfare of modern bird genetics – all without compromising on the durability and performance you expect from Big Dutchman.

KEY BENEFITS

Optimized Footprint

Designed to fit seamlessly in standard houses – maintains the dimensions that work where wider nests won't.

Hybrid Nest Design

A smart balance between single-hole and community-style nests provides the right environment for modern broiler breeder genetics.

Cleaner, Higher-Quality Eggs

New nest closure system improves cleanliness and egg protection, helping reduce contamination and floor eggs.

More Efficiency, Less Waste

With 8 holes per 8-foot section and room for 4 birds per hole, the **NXB ReMix** helps you capture more eggs per bird.

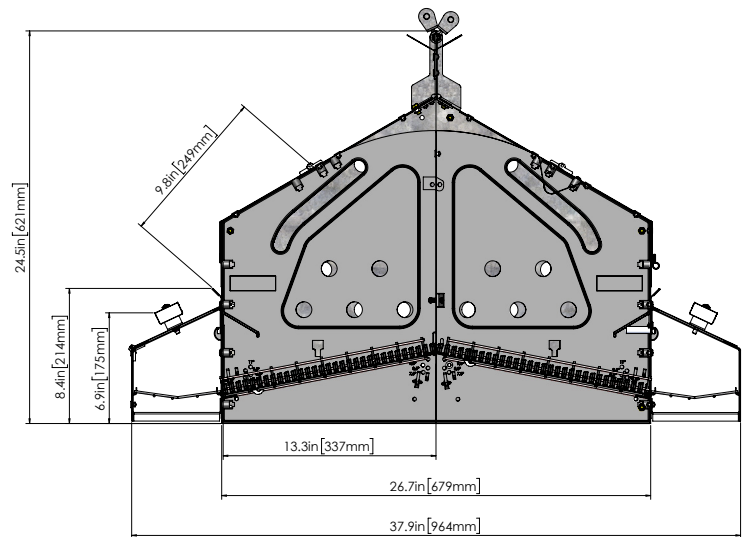

Heavy-Duty Construction

Carries forward the rugged durability of the original **NXB** – built with quality components farmers trust.

IMPORTANT FEATURES

- Small group design allows for high bird density combined with comfort – 110 birds per nest
- The nest closure is effective at safely keeping birds out
- Utilizes large nest pad perforations for cleaner eggs, integrated hooks to attach to the wire floor for secure mounting, and easy removal for cleaning
- Nest enclosure offers a dark, safe laying environment
- Designed for ease of installation
