Vista 330

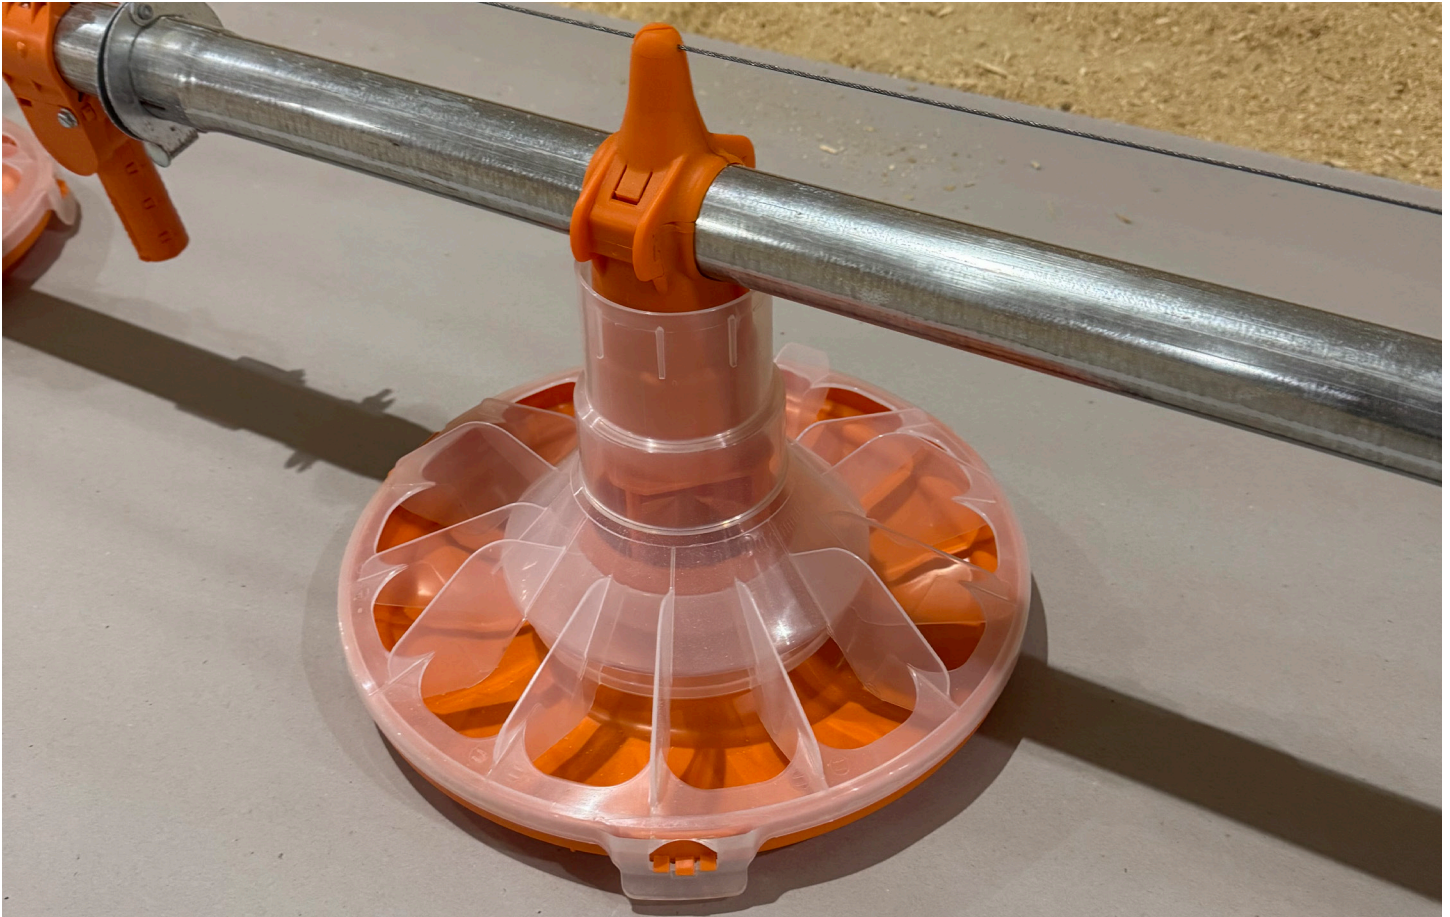

Broiler feed pan without grill

Vista 330 – Fast starts, simple settings, consistent results

Vista 330 is the newest member of our Vista pan family—engineered for broiler growing without a grill to support excellent feed access from day one through final grow-out. With a centrally activated 360°

flooding mechanism, a single fixed feed level to prevent accidental changes, and a smooth, inward-curved rim, birds start fast and stay feeding cleanly. Choose from flat or deep dishes and optional sliding

shut-off to match your management style. Rapid, tool-free installation and a swinging/rotating pipe fastening simplify setup and daily handling for reliable performance, flock after flock.

Important advantages

- 360° flooding mechanism that can be activated centrally by lowering the feed line
- Swinging / rotating fastening at the pipe
- 1 feed level: no accidental feed level change
- Divided sections
- Available with sliding shut-off
- Rapid installation without tools
- Smooth pan rim curved to the inside
- Can be combined with flat or deep dishes
